*From the statewide database used to issue and process mail-in ballots.This number is current as of November 8th, which was the last day that a mail-in ballot could be issued.

** From the statewide database used to issue and process mail-in ballots. This number will be updated daily. While the last day for a local board to receive a mail-in ballot was Friday, November 18th, this numebr may continue to increase for local boards that are still canvassing ballots as they continue to mark timely, received ballots as received in the statewide database.

*** Number reported from the voting system. This number will be updated as local boards count ballots.

**** Ballots left to count is the number of ballots received minus the number of ballots canvassed. For local boards that are still counting ballots, the true number of mail-in ballots left to count will be smaller than the number listed becuase some mail-in ballots are counted during the provisional canvass (which took place on November 16th and/or 17th in for most local boards), in order to keep private the identity of provisional voters. If a zero is listed in this column, it means that the local board has finished counting all mail-in and provisional ballots. The difference in the total ballots received and the total ballots canvassed represents those mail-in ballots that were canvassed with the provisional ballots.
